Following are explanations of the matters happened, and, my response of this time.

1. Claim 2

(i) When I filed RCE on 07/14/2010, claim 2 had a change. It was only one character "s" added to show plurality of the word "timing". So, I think claim identifier "currently amended" was correct.

(ii) Then, "Notice of Non-Compliant Amendment" (dated 7/27/2010) came, telling as:
"Claim 2 has the wrong status identifier"

(iii) Unfortunately, I also forgot that there was small change, and changed status identifier of claim2 to "previously amended" and filed on 8/2/2010.

(iv) Next I received "Failure to Acceptably Respond to Notice of Non-Compliant Amendment" telling status identifier of claim2 is non-compliant.

2. Response: Changes in Claims

Status identifier for claim 2 is returned to "Currently amended". And, not to be missed, one word of single form is replaced by one word of plural form.

Some of Status Identifiers are replaced with specified expression in 37 CFR 1.121. Not claim 2, but several previous expressions "previously amended" are now replaced by "Previously presented". Also, "newly added" are replaced by "New".
